Awang Behartawan

B. 1970, Palembang, Indonesia

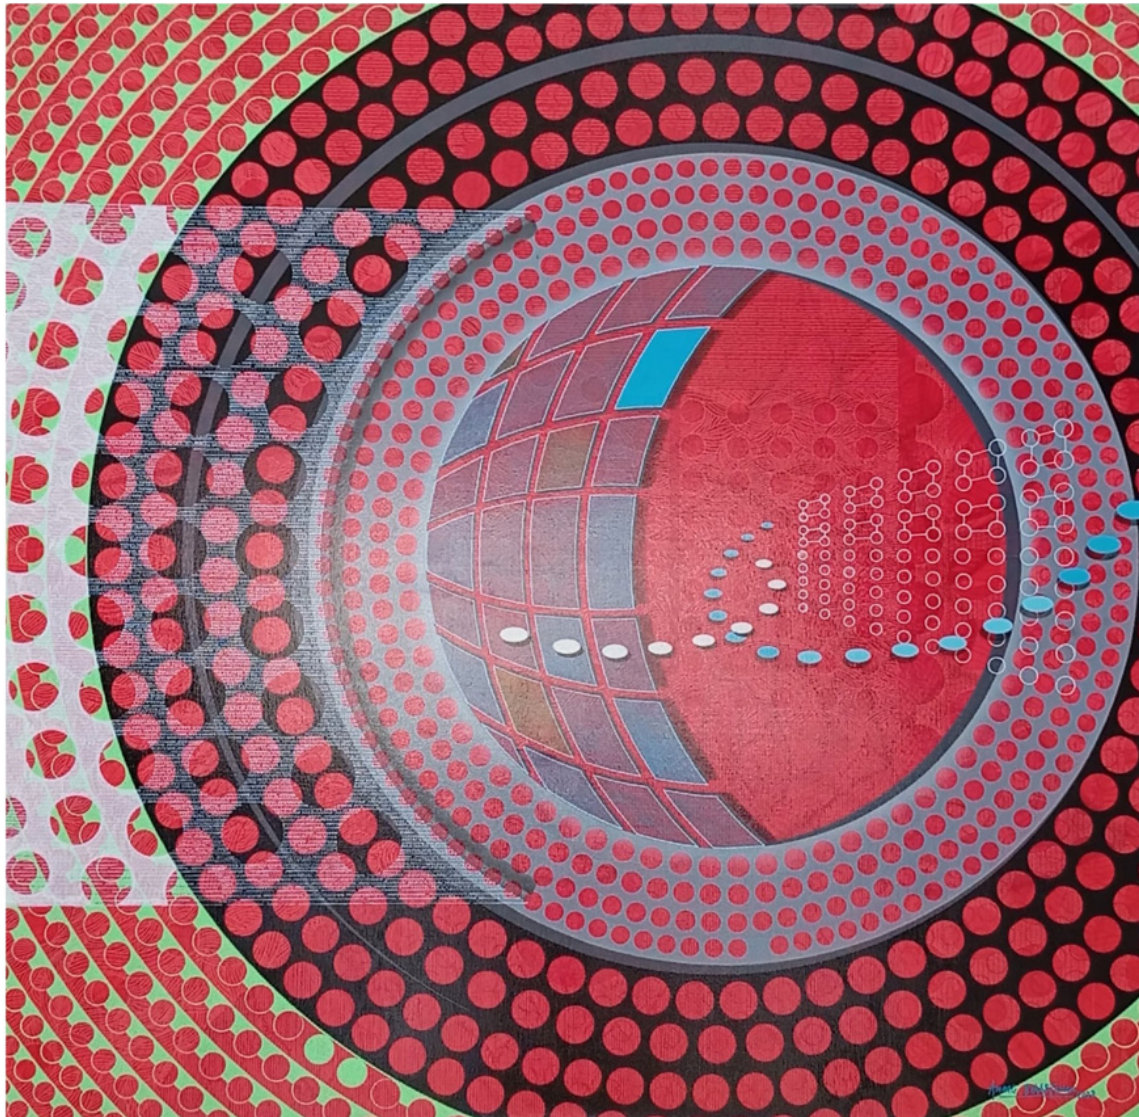

I weave the artistic process with elements from other universes, based on the mathematical formula for fractal geometry creates compelling digital and manual works, that illustrate the encounter between art, nature and mathematics. Fractals recognized as an endlessly repeating visual pattern and is found everywhere in nature - in humans, animals and plants.

With its fractal-works I creates continuity and repetition, mimics life process as a continuous line through the past, present and future with an element of change. For changeability is part of fractal code and indicate that nothing is stable. Our world and society is in motion and development, but is also, as fractal, connected in a closed circle: What we do today, the decisions we make will affect tomorrow. Everything that happens on one side of the world, will have consequences on the other side. And back again. We are all part of a world community.

Elyezer

B. 1956, Banyuwangi, Indonesia

Since childhood, Elyezer have enjoyed drawing activities, and further on until now. Learning from seniors in Banyuwangi. Together with friends in their area, they established an Art Studio and began actively participating in painting activities, exhibiting in the Independence Day Exhibitions every August, at the Siliragung field, Pesanggaran, South Banyuwangi. There were times when he stayed in Bali, Surabaya, Yogyakarta, to continue developing his painting skills through joint exhibitions, including in group exhibitions of East Java artists, HOLOPIS KUNTUL BARIS.

Most recently, along with 9 Banyuwangi artists, SATU SAMA community was organized to accommodate art activities in Banyuwangi. Since 2016, his works have been managed by Jagad Gallery, and together, Elyezer has been active in Jagad Gallery events in Bali and Jakarta.

“Painting is a pleasure in itself, allowing the realization of ideas and creative concepts in visual works. The tendency to work with sand texture and thick paint is particularly intriguing in exploring the artistic visual of their work. Raised in a Pastor’s family, their works often reflect Christian spirit themes.”

Selected group exhibitions of Elyezer include Art Jakarta Garden, Pelataran Hutan Kota, Organized by Jagad Gallery (2024); Year End Design Market, Townhall Indonesia Design District, Organized by Jagad Gallery (2023); “Ungkap Jagad”, Jagad Gallery Jakarta (2023); “Kecil itu Indah” Ijen Geopark (2021); LARAS, *Wanita Paramitha Kencana* Building, Banyuwangi (2019).
